Mt/y

We treat PFAS-contaminated waste. Veolia's patented Drop® technology enables the elimination of several PFAS targets with exceptional efficiency, up to 99.9999%, in an incineration process at over 900 °C.

OUR TREATMENT FACILITIES

29
physico-chemical and biological
treatment units

14
physico-chemical mineral
treatment units

7
hazardous waste storage facilities

19
recycling units: solvent, oil, metals,
hydrocarbons, batteries, etc.

16
soil treatment management sites

17
incineration lines

47
sorting, transit and grouping
platforms

A network of
REMEDATION agencies in Europe
